

## Let's Go to College: School Success (2nd & 3rd Grade)

You'll learn a lot when you go to college, just like you're learning a lot in your school right now! Something that's also important to learn right now is how to be tidy. When you put items in the right place, you'll spend less time looking for supplies and more time learning new skills. It's also good for you to learn the importance of attending school. Going to school every day helps you stay on top of assignments and prepares you for the next grade level. Also, having a quiet place to study can help you focus on your tasks. When you have homework or would like to read your favorite book, you should have a special place to go that's free from distractions like cell phones, playful pets or a television. Learning how to be tidy, going to school every day and finding a quiet place to study can help you succeed in school.
