

Let's Go to College: Career Discovery (4th and 5th Grade)

College is a place where you receive knowledge and skills that will help you succeed when you enter the workforce. Before you start working, however, you first have to get a job. To get a job after college, you should do some research – check with companies that offer jobs in your field of study, join career groups that operate through websites or mobile apps, and Google job listings in your area. Once you find a job that interests you, complete and send in your resume. If you're chosen to interview for the job, learn as much as possible about the company and position to which you're applying. Don't forget to send a thank you letter after the interview.

Below is a list of jobs that are currently hiring. Look through the jobs and circle the ones you want to apply for!
